Created: March 26, 2026  
Last Updated: March 30, 2026

---

## Overview

This repository contains code for the 2026 family structure project using the **Panel Study of Income Dynamics (PSID)**, a longitudinal household survey collected annually (1968–1997) and biennially (1999–2023) by the University of Michigan.

---

## Software

| Tool                               | Purpose                                                                        |
|------------------------------------|--------------------------------------------------------------------------------|
| <b>Stata</b>                       | Data cleaning, construction, and regression analysis ( <code>.do</code> files) |
| <b>Python</b>                      | Data wrangling and exploratory analysis ( <code>.ipynb</code> notebooks)       |
| <b>L<sup>A</sup>T<sub>E</sub>X</b> | Tables and documents ( <code>.tex</code> / <code>.pdf</code> )                 |
| <b>Git / GitHub</b>                | Version control                                                                |

Auxiliary L<sup>A</sup>T<sub>E</sub>X files (`.aux`, `.log`, `.toc`, etc.) are automatically cleaned after each compilation via the VS Code LaTeX Workshop setting `latex-workshop.latex.autoClean.run: ‘‘onBuilt’’`. They are also excluded from the repository via `.gitignore`.

---

## Repository Structure

| File / Folder          | Description                                                 |
|------------------------|-------------------------------------------------------------|
| 00_globals.do          | Global macros and paths                                     |
| 00_fims*.do / .dta     | Family matching                                             |
| 00_RENAMING_v1.do      | Variable renaming script                                    |
| _psid                  | Main data wrangling file                                    |
| A1_vs/                 | Archive Folder                                              |
| git-workflow-guide.md  | Git command reference (Markdown)                            |
| git-workflow-guide.tex | Git command reference (L <sup>A</sup> T <sub>E</sub> X/PDF) |
| .gitignore             | Excluded file types                                         |
| _archive/              | Older script versions                                       |

Raw PSID family-year data folders (`fam1968/` through `fam2023er/`) and individual-level data (`ind2023er/`) are stored locally but excluded from the repository via `.gitignore`. For details on downloading raw PSID data, see [psid.org](https://psid.org).

## Key Scripts

| File             | Description                                          |
|------------------|------------------------------------------------------|
| 00_globals.do    | Sets global paths and macros used across all scripts |
| 00_fims_pars.do  | Cleans PSID parent file                              |
| 00_fims_gpars.do | Cleans PSID grandparent file                         |
| 00_fims_sib.do   | Cleans PSID sibling file                             |
| _psid            | Constructs the complete analysis panel               |

## Git Workflow

See `git-workflow-guide.md` (or the compiled `git-workflow-guide.pdf`, also available in L<sup>A</sup>T<sub>E</sub>X) for a full reference of Git commands used in this project, including:

- Everyday push workflow
- First-time repository setup
- `.gitignore` management
- Troubleshooting rejected pushes

**Quick reference — everyday push:**

```
git pull          # get latest changes from GitHub
git add .         # stage all changes
```

```
git commit -m "describe_changes"  
git push # upload to GitHub
```

---

## Data Source

Panel Study of Income Dynamics, public use dataset. Produced and distributed by the Survey Research Center, Institute for Social Research, University of Michigan, Ann Arbor, MI (2025).

---

## Variables

\* See excel sheet "Variables.xlsx"

## 00\_RENAMING\_v1.do Documentation

The file 00\_RENAMING\_v1.do inputs each PSID year file, retains only variables of interest, and standardizes these variable names across different waves.

Comparable variables between years are identified using `psid.xlsx` and yearly codebooks, all available for download at [psid.org](http://psid.org).

# **\_psid Documentation**

## **00. Program Set Up**

### **Part I**

1. For survey years, 1968–2023
  1. Import year data file (‘‘famYYYY.dta’’ or ‘‘famYYYYer.dta’’)
  2. Rename family ID variable ‘‘fam’’
  3. Generate variable for year

4. Pass through ‘‘00\_RENAMING\_V1.do’’
2. Merge together all cleaned surveys for survey years 1968–2023.

## **Part 2**

## **Part 3**
